

Using Innovation To Meet The Water Needs Of The World

Genesis Water Technologies proven industrial process water, water reuse and waste water treatment solutions are designed, engineered, and built to exceed established regulatory requirements, serving clients in the pharmaceutical industry, textile industry, pulp and paper industry and manufacturing industries across the world.

We have the expertise and global reach to provide these specialized solutions to leading industrial companies to optimize water management, maintain regulatory compliance, and alleviate problems associated with water scarcity.

#### For applications including:

- Process water
- Waste water treatment and reuse

#### Our Solutions Offer You:

- Optimized Management of Water
- Modular Design for Environmental Footprint Reduction
- Lower Operating & Maintenance Costs
- Simple Integration into existing and new facilities
- Regulatory Compliance

Genesis Water Technologies provides maximum flexibility and value for our clients and local partners around the world to assist them in dealing with environmental compliance issues and the challenges associated with water scarcity.

## Serving our clients specific needs

### Specialized Technologies include:

#### Raw Water Treatment

- Specialized Electrocoagulation
- Dissolved Air Flotation
- Primary Filtration

#### Secondary Treatment

- Specialized Filtration Systems
- Advanced Oxidation Process

#### Tertiary Treatment (Membrane Processes)

- Ultrafiltration
- Nanofiltration
- Reverse Osmosis Desalination

#### Zero liquid Discharge

- Evaporation / Crystallization

Genesis Water Technologies provides process engineering services, technical support agreements, system spare parts and annual consumables agreements for our water treatment solutions including:

- Filtration medias (Anthracite, GWT Zeolite, Calcite, Activated Carbon, KDF, Sand)
- Membranes / Membrane Vessels
- Filter Cartridges
- RO Anti-scalant chemicals
